Matt and Kathie:

For the august 6th data set, is there is there an expanded one-line statement we can say about the location of the August 6th data. For example the August 12th data set, the messaging had a first line statement of: "Ten surface water samples were collected at

nine (9) locations south of Colorado along the Animas River and the San Juan River of New Mexico on August 12th, 2015".

Can we use this same statement but just replace the number of samples and the date?

Terry
